New Golf GTI. The next generation of power.

Life in the GTI Lane just got a major upgrade.

For generations, the Golf GTI has been the epitome of power and performance. The eighth generation of this icon is no different – intuitively delivering even more power, perfectly complemented by precision German engineering and intelligent features that make this the most digitally advanced GTI ever.

Can you handle the power?

With its 2.0-litre TSI engine, the performance hatchback delivers an impressive 180kW that propels you from 0 to 100 km/h in just 6.4 seconds.

This level of power guarantees the ride of your life on straights and just begs to be put to use on winding routes. Here, you'll also receive a helping hand from the front differential lock, which stabilises the Golf GTI and keeps you in control of your drive.

The new Golf GTI also comes with the DSG® dual clutch gearbox with shift-by-wire capability. This electronic system lets you effortlessly shift through gears allowing for optimal vehicle performance.

GTI genes meet cutting-edge design

The eighth generation of this icon is still distinctly a GTI, but with sleek new updates and technology to keep it firmly future-forward.

The new GTI combines the best of the past with advanced design principles to create a new signature look, featuring a distinctive red line that stretches across the front with a honeycomb design, and black air intakes highlighting the radiator grille.

Slim LED matrix headlights with IQ.LIGHT use 22 individual LEDs in each light to illuminate the road ahead, helping you avoid hazardous situations. If you choose the Matrix LED package, you'll have a sliding turn indicator for extra flair as well.

A strikingly imposing bumper and extended side skirts take the aggressively athletic front to a new level. At the back, the roof spoiler and chrome-plated tail pipes are distinctively GTI, while the LED tail light clusters round off its unique appearance.

The power to connect

Every element of the Golf GTI has been engineered to let the driver intuitively connect with the latest technology Volkswagen has to offer.

The classic function knobs have made way for the Innovision cockpit with a 10.25-inch touch-sensitive screen that boasts gesture control capability and lets you control everything from music to the Climatronic air-conditioning with both touch and swipe actions. The multifunction leather steering wheel's capacitive buttons obey your every command with a simple tap of the finger. Swipe to open the sunroof and flick through 30 different ambient lighting colours as you sit back in your sporty "Vienna" leather seats to revel in the freedom the GTI inspires.

Taking things to the next level is the Harman Kardon sound system with a 12-channel amplifier with 480W output from eight speakers, one centre speaker and a subwoofer. Couple this with gesture control of the volume and you end up with a GTI poised to deliver the ultimate sound experience.

Tech meets torque

Even before you get in, the keyless entry system makes it clear that the GTI is power and intelligence fused into one.

Once you're on the road, you'll benefit from IQ.DRIVE to make your drive safer and more intuitive. Features like Travel Assist use Adaptive Cruise Control and Lane Assist for a more relaxed journey. The Rear View camera and Park Assist features make pulling into a tight spot easier than ever. The GTI also offers additional intuitive technology such as Blind Spot Monitor with Rear Traffic Alert and Lane Assist.

You'll also be able to pair up your phone through We Connect Go, putting all the most important vehicle information at your fingertips. From a logbook and fuel monitor, driving style analysis and driving statistics, to service schedule and booking, and parking space locator, We Connect Go is your personal car companion.

Be sure to download the app* and have everything you need in the palm of your hands.

*We Connect Go is compatible with Android and iOS devices.
